

JURUPA UNIFIED SCHOOL DISTRICT

UPDATED COVID-19 PREVENTION PROGRAM (CPP)

JURUPA UNIFIED SCHOOL DISTRICT
4850 Pedley Road | Jurupa Valley, CA 92509

Updated COVID-19 Prevention Program (CPP) for the Jurupa Unified School District

This CPP is designed to control employees' exposures to the SARS-CoV-2 virus (COVID-19) that may occur in our workplace.

Date: July 2021

Authority and Responsibility

The Director of Risk Management has overall authority and responsibility for implementing the provisions of this CPP in our workplace. In addition, all managers and supervisors are responsible for implementing and maintaining the CPP in their assigned work areas and for ensuring employees receive answers to questions about the program in a language they understand.

All employees are responsible for using safe work practices, following all directives, policies and procedures, and assisting in maintaining a safe work environment.

Identification and Evaluation of COVID-19 Hazards

We implement the following in our workplace:

- Conduct workplace-specific evaluations.
- Document the vaccination status of our employees by using a Google form, which is maintained as a confidential medical record.
- Evaluate employees' potential workplace exposures to all persons at, or who may enter, our workplace.
- Develop COVID-19 policies and procedures to respond effectively and immediately to individuals at the workplace who are a COVID-19 case to prevent or reduce the risk of transmission in the workplace.
- Review applicable orders and general and industry-specific guidance from the State of California, Cal/OSHA, and the local health department related to COVID-19 hazards and prevention.
- Evaluate existing COVID-19 prevention controls in our workplace and the need for different or additional controls.
- Conduct periodic inspections as needed to identify and evaluate unhealthy conditions, work practices, and work procedures related to COVID-19 and to ensure compliance with our COVID-19 policies and procedures.

Employee participation

Employees and their exclusive representative are encouraged to participate in the identification and evaluation of COVID-19 hazards by employees communicating concerns about potential hazards with their supervisor and by the employees' exclusive representatives communicating concerns about hazards with Human Resources.

Employee screening

We screen our employees by having them self-screen according to CDPH guidelines.

Correction of COVID-19 Hazards

Unsafe or unhealthy work conditions, practices or procedures will be reported to Human Resources and corrected in a timely manner based on the severity of the hazards. Follow-up measures will be taken to ensure timely correction.

Control of COVID-19 Hazards

Face Coverings

We require all non-vaccinated employees to wear face coverings while indoors or in a vehicle with another employee. And we require all employees to wear face coverings while indoors at a school site, regardless of vaccination status. We ensure that face coverings are properly worn over the nose and mouth and are replaced or cleaned as needed.

Employees required to wear face coverings in our workplace may remove them under the following conditions:

- When employees are alone in their work area. When employees are alone in their own work area without a face covering and another person enters their work area, employees are required to put on a face covering.
- While eating or drinking at the workplace, provided employees are at least six feet apart and outside air supply to the area, if indoors, has been maximized to the extent feasible.
- Employees are required to wear respirators in accordance with our respirator program that meets section 5144 requirements.
- Employees who cannot wear face coverings due to a medical or mental health condition or disability, or who are hearing-impaired or communicating with a hearing-impaired person. Alternatives will be considered on a case-by-case basis.
- Specific tasks that cannot feasibly be performed with a face covering. This exception is limited to the time in which such tasks are being performed.

Any employee not wearing a required face covering or allowed non-restrictive alternative, will be at least six feet apart from all other persons unless the unmasked employee is fully vaccinated.

We will not prevent any employee from wearing a face covering when it is not required unless it would create a safety hazard, such as interfering with the safe operation of equipment.

Face coverings will also be provided to any employee that requests one, regardless of their vaccination status.

Engineering controls

For indoor locations, we increased filtration efficiency to the highest level compatible with our existing ventilation system by installing the largest-sized MERV air filters that our HVAC units can accommodate.

Cleaning and disinfecting

We implement the following cleaning and disinfection measures for frequently touched surfaces and objects, such as doorknobs, elevator buttons, equipment, tools, handrails, handles, controls, phones, headsets, bathroom surfaces, and steering wheels:

Custodial staff maintains routine cleaning frequency. In work areas where employees have been present and for frequently-touched surfaces, custodial staff applies a sanitizing mist containing a pesticide from the United States Environmental Protection Agency List N Disinfectants for Coronavirus (COVID-19) on a nightly basis. Custodial staff have been trained on the use of pesticides and wear

appropriate PPE while using them.

Should we have a COVID-19 case in our workplace, in addition to spraying the sanitizing mist in the areas where the employee was present, custodial staff will also wipe down all surfaces where the employee was present with the same sanitizing product.

Hand sanitizing

To implement effective hand sanitizing procedures, we:

- Evaluate handwashing facilities.
- Determine the need for additional facilities.
- Encourage and allow time for employee handwashing.
- Provide employees with effective hand sanitizer.
- Encourage employees to wash their hands with soap and hot water for at least 20 seconds.

Personal protective equipment (PPE) used to control employees' exposure to COVID-19

We evaluate the need for PPE (such as gloves, goggles, and face shields) as required by section 3380, and provide and ensure use of such PPE as needed.

Upon request, we provide respirators for voluntary use to all employees who are not fully vaccinated and who are working indoors or in vehicles with more than one person.

We provide and ensure use of respirators in compliance with section 5144 when deemed necessary by Cal/OSHA.

Testing of symptomatic employees

We make COVID-19 testing available at no cost to employees with COVID-19 symptoms who are not fully vaccinated, during employees' paid time.

Investigating and Responding to COVID-19 Cases

We have developed effective procedures to investigate COVID-19 cases that include seeking information from our employees regarding COVID-19 cases, close contacts, test results, and onset of symptoms. We also ensure the following is implemented:

- Employees who test positive for COVID-19 or are believed to have been in close contact with a COVID-19 positive individual will contact the JUSD Human Resources department. JUSD's Human Resources department will ask the employee standard questions to determine exclusions from work, provide information about available leaves, and to determine if any other close contact with employees has occurred.
- Employees who had a close contact are offered COVID-19 testing at no cost during their working hours, excluding:
 - Employees who were fully vaccinated before the close contact and do not have symptoms.
 - COVID-19 cases who were allowed to return to work per our return-to-work criteria and have remained free of symptoms for 90 days after the initial onset of symptoms, or for cases who never developed symptoms, for 90 days after the first positive test.
- The information on benefits described in Training and Instruction, and Exclusion of COVID-19 Cases, below, will be provided to employees.
- Written notice within 1 day of our knowledge of a COVID-19 case that employees at the worksite may have been exposed to COVID-19. This notice will be provided to all employees (and their exclusive representative), independent contractors and other employers at the worksite during the high-risk exposure period.

System for Communicating

Our goal is to ensure that we have effective two-way communication with our employees, in a form they can readily understand, and that it includes the following information:

- That employees should report COVID-19 symptoms and possible hazards to Human Resources.
- That employees can report symptoms and hazards without fear of reprisal.
- Our procedures or policies for accommodating employees with medical or other conditions that put them at increased risk of severe COVID-19 illness.
- Where testing is not required, how employees can access COVID-19 testing.
- The COVID-19 hazards employees (including other employers and individuals in contact with our workplace) may be exposed to, what is being done to control those hazards, and our COVID-19 policies and procedures.

Training and Instruction

We provide effective employee training and instruction that includes:

- Our COVID-19 policies and procedures to protect employees from COVID-19 hazards, and how to participate in the identification and evaluation of COVID-19 hazards.
- Information regarding COVID-19-related benefits to which the employee may be entitled under applicable federal, state, or local laws.
- The fact that:
 - COVID-19 is an infectious disease that can be spread through the air.
 - COVID-19 may be transmitted when a person touches a contaminated object and then touches their eyes, nose, or mouth.
 - An infectious person may have no symptoms.
- The fact that particles containing the virus can travel more than six feet, especially indoors, so physical distancing, face coverings, increased ventilation indoors, and respiratory protection decrease the spread of COVID-19 and are most effective when used in combination.
- The right of employees that are not fully vaccinated to request a respirator for voluntary use, without fear of retaliation, and our policies for providing the respirators. Employees voluntarily using respirators will be trained according to section 5144(c)(2) requirements:
 - How to properly wear them.
 - How to perform a seal check according to the manufacturer's instructions each time a respirator is worn, and the fact that facial hair can interfere with a seal.
- The importance of frequent hand washing with soap and water for at least 20 seconds and using handsanitizer when employees do not have immediate access to a sink or hand washing facility, and that hand sanitizer does not work if the hands are soiled.
- Proper use of face coverings and the fact that face coverings are not respiratory protective equipment. Since COVID-19 is an airborne disease, N95s and more protective respirators protect the users from airborne disease, while face coverings primarily protect people around the user.
 - The conditions where face coverings must be worn at the workplace.
 - That face coverings are additionally recommended outdoors for people who are not fully vaccinated if six feet of distance cannot be maintained.
 - Employees can request face coverings and can wear them at work regardless of vaccination status and without fear of retaliation.
- COVID-19 symptoms, and the importance of obtaining a COVID-19 test and not coming to work if the employee has COVID-19 symptoms.
- Information on our COVID-19 policies and how to access COVID-19 testing and vaccination, and the fact that vaccination is effective at preventing COVID-19, protecting against both transmission and serious illness or death.

Exclusion of COVID-19 Cases and Employees who had a Close Contact

Where we have a COVID-19 case or close contact in our workplace, we limit transmission by:

- Ensuring that COVID-19 cases are excluded from the workplace until our return-to-work requirements are met.
- Excluding employees that had a close contact from the workplace until our return-to-work criteria have been met, with the following exceptions:
 - Employees who were fully vaccinated before the close contact and who do not develop COVID-19 symptoms.
 - COVID-19 cases who returned to work per our return-to-work criteria and have remained free of COVID-19 symptoms, for 90 days after the initial onset of COVID-19 symptoms, or for COVID-19 cases who never developed COVID-19 symptoms, for 90 days after the first positive test.
- For employees excluded from work, continuing, and maintaining employees' earnings, wages, seniority, and all other employees' rights and benefits.
- Providing employees at the time of exclusion with information on available benefits.

Reporting, Recordkeeping, and Access

It is our policy to:

- Report information about COVID-19 cases and outbreaks at our workplace to the local health department whenever required by law, and provide any related information requested by the local health department.
- Maintain records of the steps taken to implement our written COVID-19 Prevention Program in accordance with section 3203(b).
- Make our written COVID-19 Prevention Program available at the workplace to employees, exclusive employee representatives, and to representatives of Cal/OSHA immediately upon request.
- Keep a record of and track all COVID-19 cases. Relevant information will be made available to employees and exclusive employee representatives, or as otherwise required by law, with personal identifying information removed.

Return-to-Work Criteria

- **COVID-19 cases with symptoms** will not return to work until all the following have occurred:
 - At least 24 hours have passed since a fever of 100.4 °F. or higher has resolved without the use of fever-reducing medications; and
 - COVID-19 symptoms have improved, and
 - At least 10 days have passed since COVID-19 symptoms first appeared.
- **COVID-19 cases who tested positive but never developed symptoms** will not return to work until a minimum of 10 days have passed since the date of specimen collection of their first positive COVID-19 test.
- A negative COVID-19 test will not be required for an employee to return to work once the requirements for "cases with symptoms" or "cases who tested positive but never developed symptoms" (above) have been met.
- Non-fully vaccinated persons who had a close contact may return to work as follows:
 - Close contact but never developed symptoms: when 10 days have passed since the last known close contact.
 - Close contact with symptoms: when the "cases with symptoms" criteria (above) have been met, unless the following are true:
 - The person tested negative for COVID-19 using a polymerase chain reaction (PCR) COVID-19 test with specimen taken after the onset of symptoms; and
 - At least 10 days have passed since the last known close contact, and
 - The person has been symptom-free for at least 24 hours, without using fever-

reducing medications.

- If an order to isolate, quarantine, or exclude an employee is issued by a local or state health official, the employee will not return to work until the period of isolation or quarantine is completed or the order is lifted.

COVID-19 Prevention in Employer-Provided Transportation

Assignment of transportation

To the extent feasible, we reduce exposure to COVID-19 hazards by assigning employees sharing vehicles to distinct groups and ensuring that each group remains separate from other such groups during transportation, during work activities, and in employer-provided housing. We prioritize shared transportation assignments in the following order:

- Employees residing in the same housing unit are transported in the same vehicle.
- Employees working in the same crew or workplace are transported in the same vehicle.
- Employees who do not share the same household, work crew or workplace are transported in the same vehicle only when no other transportation alternatives are feasible.

Face coverings and respirators

We ensure that the:

- Face covering requirements of our CPP **Face Coverings** are followed for employees waiting for transportation, if applicable.
- All employees who are not fully vaccinated are provided with a face covering upon request, which must be worn unless an exception under our CPP Face Coverings applies.
- Upon request, we provide respirators for voluntary use in compliance with subsection 5144(c)(2) to all employees in the vehicle who are not fully vaccinated.

Screening

We develop, implement, and maintain effective procedures for screening and excluding drivers and riders with COVID-19 symptoms prior to boarding shared transportation. We screen our employees by having them self-screen according to CDPH guidelines.

Cleaning and disinfecting

We ensure that:

- All high-contact surfaces (door handles, seatbelt buckles, armrests, etc.) used by passengers are cleaned to prevent the spread of COVID-19 and are cleaned and disinfected if used by a COVID-19 case during the high-risk exposure period, when the surface will be used by another employee within 24 hours of the COVID-19 case.
- All high-contact surfaces used by drivers, such as the steering wheel, armrests, seatbelt buckles, door handles and shifter, are cleaned to prevent the spread of COVID-19 between different drivers and are disinfected after use by a COVID-19 case during the high-risk exposure period, if the surface will be used by another employee within 24 hours of the COVID-19 case.
- We provide sanitizing materials, training on how to use them properly, and ensure they are kept in adequate supply.

Ventilation

We ensure that vehicle windows are kept open, and the ventilation system is set to maximize outdoor air and not set to recirculate air. Windows do not have to be kept open if one or more of the following

conditions exist:

- The vehicle has functioning air conditioning in use and excessive outdoor heat would create a hazard to employees.
- The vehicle has functioning heating in use and excessive outdoor cold would create a hazard to employees.
- Protection is needed from weather conditions; such as rain or snow.
- The vehicle has a cabin air filter in use and the U.S. EPA Air Quality Index for any pollutant is greater than 100.

Hand hygiene

We provide hand sanitizer in each vehicle and ensure that all drivers and riders sanitize their hands before entering and exiting the vehicle. Hand sanitizers with methyl alcohol are prohibited.
