Letter from the Superintendent

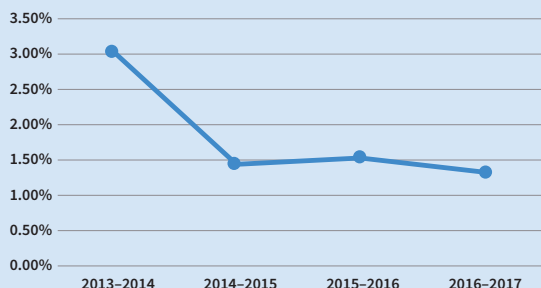

Dear Neighbor,

As Superintendent of Jurupa Unified School District (JUSD), I am proud of the quality education we provide every student to help them succeed in college, careers and life.

Student Achievement on the Rise

Our schools are on the rise — our high school graduation rate now exceeds 90% and our dropout rate has steadily declined.

High School Dropout Rate Decline

Updating JUSD Schools for the 21st Century

In 2014, 60% of voters in the school district approved Measure EE, the “21st Century Readiness Job Training, Upgrade and Repair” bond measure, to address the most pressing facilities needs at JUSD schools. Measure EE provides \$144 million to upgrade career training and instructional technology, improve school safety and security and repair aging schools.

Over the last five years, dozens of modernizations and repair projects have been completed thanks to Measure EE. However, Measure EE was only estimated to address the most urgent facilities needs at the time, and \$387 million of facilities needs remain across JUSD. The District is currently planning the next phase of improvements so we can ensure our students will continue to learn without limits in safe and updated classrooms.

We are proud of what Measure EE has accomplished across our school sites and we want to share a community update on how funds are being spent and the progress we have made.

Thank you for your continued support.

Sincerely,

Elliott Duchon
Superintendent

Measure EE Project Goals

Upgrade career training and instructional technology

Improve vocational facilities and science and computer labs for modern careers and skilled trades

Improve school safety and security

Repair aging classrooms, roofs, restrooms and electrical systems

Measure EE Bond Citizens' Oversight Committee

On March 16, 2015, the Board of Education appointed a Citizens' Oversight Committee ("COC") to oversee Measure EE expenditures. The COC reviews copies of the District's Bond Audit Reports and provides an annual report to the Board of Education on the COC's activities and proper expenditure of bond proceeds.

Measure EE COC Members:

Ross Leja, Chairperson, Member At-Large

Janis Maggs, Vice Chairperson, Member At-Large

Ron Anderson, Taxpayer Organization Member

Sandra Franco, Parent Representative

Sheryl Schmidt, Senior Citizen Group Representative

Linda Thompson, Local Business Representative

Delia Zapien, Parent and Parent-Teacher Organization Representative

All COC reports are available to the public and can be found at www.tinyurl.com/JurupaCOC.

Measure EE Completed Projects

The District's Facilities Master Plan identified a large scope of repair, modernization and upgrade needs at our school sites. Though we will not be able to address all of these needs with Measure EE funds, we are proud of the progress that has been made. Here are some highlights of our completed projects across the District:

Safety and Security Upgrades

Thanks to Measure EE, the following safety and security projects have been completed:

- New gates and security hardware at seven school sites
- Safety tinting of windows at Ina Arbuckle and Mission Bell Elementary Schools
- Infrastructure for new exterior security cameras at multiple school sites

New gates and exterior cameras to enhance student safety at school sites

New Innovation Center at Jurupa Valley High

Career Technical Education Projects

Measure EE has funded a variety of modernization projects to support Career Technical Education (CTE), including:

- New Innovation Center at Jurupa Valley High School with learning spaces that include a virtual welding simulator, laser printing lab and 3D printing lab to support CTE Pathways in Engineering and Design and Residential/Commercial Construction
- Construction of industry-relevant video editing, sound booth, control room and video recording studio to support CTE Pathway in Arts, Media and Entertainment at Rubidoux High School

For a full list of completed and in progress Measure EE projects visit www.tinyurl.com/MeasureEE.

Measure EE Completed Projects

The District's Facilities Master Plan identified a large scope of repair, modernization and upgrade needs at our school sites. Though we will not be able to address all of these needs with Measure EE funds, we are proud of the progress that has been made. Here are some highlights of our completed projects across the District:

School Site Modernizations

Measure EE provided the following modernizations throughout the District:

- Seismic upgrades and energy efficiency upgrades campus-wide
- Wireless network upgrades District-wide
- New interior lighting, entry doors, integrated paging system, electronic door hardware and flooring at multiple school sites

Updated classroom with new lighting, paint and flooring at Ina Arbuckle Elementary

Modernized classroom wing at Ina Arbuckle Elementary

Classroom Improvements and Construction

Measure EE funded the following classroom and library construction and improvement projects:

- New two-story, 8-classroom buildings at Stone Avenue and Sunnyslope Elementary Schools
- New Library/Media Center at Ina Arbuckle and Mission Bell Elementary Schools
- Modernization of permanent classroom wings at multiple school sites
- New playgrounds at nine elementary school sites
