

Jurupa Unified School District Information About Measure E

Jurupa Unified School District (JUSD) is committed to providing high-quality education to all students by providing classrooms, labs and school facilities where they can learn without limits.

Equal Access to Modern Classrooms and Labs

While some schools have modern classrooms, labs and career training facilities, most do not, and are in need of essential upgrades and repairs. Updating schools would help ensure all our students have the same educational opportunities as others in the region – preparing students who plan to go to college for future success and providing career training to those who do not plan to go to college.

Improvements to music, arts and athletic facilities are need in our community because students participating in these activities are more likely to stay on track and are less likely to get involved in drugs, gangs and crime.

Safe Schools for All Students

While JUSD has prioritized improving school safety and security at all of our campuses, we do not have the resources available to provide all of our schools with the full scope of a modern safety and security system. The majority of schools still require upgrades to centralized lockdown systems, security fencing, security cameras, emergency communications systems, smoke detectors, fire alarms and sprinklers.

Measure E: Local Funding to Improve Jurupa Schools

In order to address our schools' needs, the JUSD Board of Trustees unanimously voted to place Measure E, a \$192 million local school improvement bond measure on the March 3, 2020 ballot. Measure E would:

- Improve student safety and campus security systems
- Repair or replace deteriorating roofs, plumbing, sewer lines, electrical systems and wood beams with extensive termite damage
- Remove hazardous materials like asbestos and lead paint, as needed, from older schools
- Provide the classrooms, facilities, equipment and technology needed to support high-quality instruction in math, science, engineering and technology
- Keep computer systems and instructional technology up-to-date
- Provide modern labs and career training facilities at each high school so all students are prepared for college and in-demand careers in fields like health sciences, engineering, technology and skilled trades

Mandatory Fiscal Accountability

- All money would stay local to support students and could not be taken away by the State
- A project program list detailing how Measure E funds would be used, a Citizens' Oversight Committee and independent audits would be required
- No money from Measure E could be used for administrators' salaries or benefits
- Measure E would cost property owners approximately \$42 per \$100,000 of assessed (not market) value per year and cost the typical homeowner approximately \$98 per year
