Analyzing Facilities Needs in All Jurupa Schools

Here in Jurupa Unified School District (JUSD), we are committed to providing every student with the quality academic programs and educational facilities they need to succeed in college and careers.

In order to ensure our students have the same educational opportunities as others in the region, we are in the process of evaluating the facilities needs facing our schools. While some of our schools have recently been updated, others have not and are in need of basic repairs, safety upgrades and modernizations for 21st-century learning.

Jurupa School Facilities Needs by the Numbers

26 School Sites

All 26

schools need safety and security upgrades

12

schools past due for modernization

200

classrooms are currently in portables

Improving Safety at All Jurupa Schools

While JUSD has prioritized improving school safety and security at all of our campuses, we do not have the resources available to provide all of our schools with the full scope of a modern safety and security system. Equipping a school with all the necessary components of a modern safety and security system costs nearly \$1 million per school site, an amount that far exceeds the District's day-to-day operating budget.

The majority of schools still require upgrades to centralized lockdown systems, security fencing, security cameras, emergency communications systems, smoke detectors, fire alarms and sprinklers.

Equal Access to Updated Classrooms, Labs and School Facilities

Repairing and upgrading all Jurupa schools would ensure students in older schools have the same learning opportunities as those in newer schools, including in science, technology, engineering, arts and math.

Improvements to music, arts and athletic facilities are needed in our community because students participating in these activities are more likely to stay on track and are less likely to get involved in drugs, gangs and crime.

Potential Local School Improvement Measure

In order to provide safe and updated learning environments for all students, the JUSD Board of Trustees is considering placing a \$171 million local school improvement bond measure on the March 2020 ballot. A measure would cost the typical homeowner approximately \$98 per year and would provide local funding to:

- Remove hazardous materials like asbestos and lead paint from older schools
- Repair or replace deteriorating roofs, plumbing, sewer lines, electrical systems and wood beams with extensive termite damage where needed
- Provide the classrooms, facilities, equipment and technology needed to support high-quality instruction in math, science, engineering and technology
- Keep computer systems and instructional technology up-to-date
- Improve student safety and campus security systems
- Provide modern labs and career training facilities at each high school so all students are prepared for college and in-demand careers in fields like health sciences, engineering, technology and skilled trades

Clear System of Fiscal Accountability

- All money would stay local to support JUSD schools and could not be taken away by the State
- A project list detailing how the money would be used, a Citizens' Oversight Committee and independent audits would be required
- No money from this measure could be used for administrators' salaries or benefits

Deteriorating roofs at local schools are in need of repair.

Wood with extensive termite damage needs to be replaced.

WE WANT TO HEAR FROM YOU

Your feedback is important as we evaluate the options for addressing facilities needs in JUSD schools. Please complete the attached survey or take the survey online at tinyurl.com/JUSDsurvey to let us know your priorities for our schools.
